Hose Clamp Prepositioner

www.ife-group.com

No-Adhesive Prepositioner

The IFE hose clamp prepositioner is an innovative hose clamp installation tool that eliminates the need for messy liquid adhesives. Designed for automotive hose assembly, industrial applications, and high-volume OEM production. It offers a faster, cleaner, and more precise way to install clamps on hoses and tubes.

Patent Pending

Key Benefits & Features

- **Cost-saving solution:** Reduces material costs, energy consumption, and assembly labor time.
- **Precision alignment:** Dual window allows clamp closure access in the right location while the second window insures the clamp is perpendicular on the hose or tube.
- **Damage-free installation:** Designed to protect hoses with minimal impact on insertion force.
- **Serviceable design:** Clamps can be removed if future maintenance is needed.
- **Flexible supply options:** Parts available with pre-applied dry adhesive coating upon request.
- **Multi-clamp compatibility that works with:**

Worm Drive Clamps

Crimp/Ear Type Clamps

Spring Band Clamps

3-Step Hose Clamp Prepositioner Installation is Fast and Easy

1 Place the hose clamp in the prepositioner.

2 Slide the clamp and sleeve onto the hose or tube in the desired orientation.

3 Apply heat for about 5 seconds.

IFE Americas is a global provider of sealing and retaining solutions to meet customer needs. We offer a wide range of clamps, couplings, straps, and sleeves, with in-house testing facilities and technical support.
